Serial No. 10/632,561

Resp. to Off. Action of Sep. 13, 2009

UTILITY PATENT

B&D No. JK01243

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-20 (Canceled).

Claims 21-34 (Canceled)

Claim 35 (previously presented): A table saw, comprising:

a support surface with an aperture therethrough, for supporting a workpiece;
a beveling cutting device assembly comprising a blade adjustably extending through the support surface aperture, said blade for cutting a workpiece, the blade being disposed in a plane and having a perimeter, the blade having a rotational axis disposed below the support surface and within the perimeter of the blade, and a beveling axis substantially perpendicular to the rotational axis, whereby operation of the blade in the workpiece results in the formation of a kerf having a first and a second side in the workpiece;

a support device attached to the cutting device assembly;
a first optical emitting device adjustably coupled to the support device and disposed above the support surface to project a first optical indicator substantially aligned with the plane;

wherein the first optical emitting device is configured so as to bevel with the blade, such that said first optical indicator is projected to substantially indicate a cutting path of the blade along the workpiece; and

a second optical emitting device adjustably coupled to the support device to project a second optical indicator substantially aligned with the second side of the kerf.

Serial No. 10/632,561

Resp. to Off. Action of Sep. 13, 2009

UTILITY PATENT**B&D No. JK01243**

Claim 36 (previously presented): The table saw of claim 35, wherein the first optical emitting device is adjustably coupled to the support device to project a first optical indicator substantially aligned with the first side of the kerf.

Claim 37 (canceled).

Claim 38 (previously presented): The table saw of claim 35, wherein said first and said second optical emitting devices are lasers.

Claim 39 (previously presented): The table saw of claim 35, wherein said first and said second optical emitting devices are helium-neon lasers.

Claim 40 (previously presented): The table saw of claim 35, wherein said first optical indicator and said second optical indicator are lines of light visible to a human.

Claim 41 (previously presented): The table saw of claim 35, wherein said first and said second optical emitting device are fan laser beam generators.
